PROFILE

Full Stack Developer in training, with strong foundations in backend and frontend technologies, including Node.js, Python, JavaScript, TypeScript, MongoDB, React, and Angular. Skilled in building responsive and scalable applications using HTML, CSS, Tailwind, and modern frameworks.

Experienced with Git/GitHub workflows and agile development practices. Currently completing a Full Stack Development program, with several college projects showcased in my portfolio that demonstrate problem-solving, clean code, and end-to-end application development. Looking to grow in a backend-focused role where I can contribute to real-world projects, learn from experienced teams, and expand my expertise in server-side development and cloud technologies.

EDUCATION & QUALIFICATIONS

Diploma Full Stack Development   **2024 - 2027**

Greystone College - Canada

Knowledge in web development, data management, machine learning, databases, website creation and back-end frameworks.
